

What Is Wrong With This Picture?

FIND 7 WAYS **AQUATIC EXOTICS** ARE SPREAD.

The problems here are:

1. Boat motor and trailer could be transporting invasive species
2. Live bait may escape or have disease which may be a problem
3. The scuba diver may have invasives on his equipment from other areas
4. The pontoons may have invasive species or diseases attached
5. Don't dump bait, it may contain an invasive species or transport disease from one water to another
6. Any pets or live animals could be invasive to a new water body
7. The waders may have an invasive species attached unless cleaned properly
