Re: Review of Shallow Bedrock Zone Air Sparge Test Completion Report  
Products (SE) Pipeline Lewis Drive Release, 112 Lewis Drive, Belton, SC  
Anderson County  
Site #18693  
Petroleum Pipeline Release Reported December 8, 2014  
Shallow Bedrock Zone Air Sparge Test Completion Report received February 10, 2021

Dear Mr. Dempsey,

The South Carolina Department of Health and Environmental Control (DHEC) has reviewed the above referenced documents. The results of the Air Sparge Test indicate the Shallow Bedrock Zone has insufficient fracture apertures/density to permit air flow sufficient for air sparging to be effective. The area will continue to be monitored through routine groundwater sampling events as outlined in the *Groundwater and Surface Water Monitoring and Reporting Plan Approval (April 1, 2020 through March 31, 2021)* dated August 13, 2020. Additional remedial methods may be required in the future if chemical of concern concentrations increase or free phase product is detected in the area.

Documents should continue to be provided in paper format and pdf via a disk with Site ID # 18693 and Products (SE) Pipeline Lewis Drive Release noted in a prominent location. Should you have any questions, I can be reached at (803) 898-7542 or [mendenje@dhec.sc.gov](mailto:mendenje@dhec.sc.gov). Faxes can be sent to (803) 898-0673.

Sincerely,

Ed Mendenhall, Hydrogeologist
